TITLE/SIGNIFICANCE:

CHEESE BRICK and MOUND BRICK type ECM equipment in China

COMMENT: This is the first NPIC identification of this Soviet type ECM equipment in China. The equipment has been observed in both a garrison parking and a training mode at Chang-chia-kou Hqs Army and Barracks AL 1. Similar probable ECM equipment has also been observed at the Chi-ning Bombing Range. The CHEESE BRICK appears to be identical in size to the Soviet model. The MOUND BRICK is probably a modification of the Soviet equipment, as it is slightly longer and wider than Soviet model. This ECM equipment can be easily misidentified as fire control equipment.
